

Sustainable Development Fund Solar Photovoltaics Grant Program

Administrators: Ron Celentano • Andrew Rudin

051804

Dear Solar PV Enthusiast!

I want to thank you for your interest in solar energy. The Sustainable Development Fund's Solar Photovoltaic Grant Program is now operating for over two years and we hope that you will participate. The enclosed package includes all the information you need to make the first step in generating your very own renewable power!

If you are a customer in the PECO Energy service territory, you are eligible for a grant from the Sustainable Development Fund's (SDF) Solar Photovoltaics Grant Program to help with the cost of installing a solar electric photovoltaic (PV) system sized between 1 kW and 5 kW.

This package includes the following, which are also found as downloadable files on the SDF website, www.trfund.com/sdf/solarpv (except for Purchaser of Solar Electricity):

- **Program Description** - a detailed description about the SDF Solar PV Grant Program
- **Program Steps** - summary of the program steps for the system owner, the Participating Contractor and the PV Program Administrator
- **PV Questions & Answers** - about the technology and about the grant program
- **Tips on Choosing a PV Installer** - suggested guidelines and questions to ask
- **List of Participating PV Contractors** - check www.trfund.com/sdf/PV_Con_List.pdf for the most up to date list
- **Purchaser of Solar Electricity** - information about the *Solar Buyback Program* offered by the Energy Cooperative Association of Pennsylvania (ECAP); see www.theenergyco-op.com .
- **Economic Examples** – brief overview of the installation costs of PV systems for both residential and small commercial applications

If you have any questions after reviewing all the enclosed documentation, a Participating Contractor should be able to help you. But, if you prefer to ask us questions, please don't hesitate to call or email us. We hope that the Solar PV Grant Program will help you choose this new and exciting technology to reliably generate electricity without fuel and without pollution.

Sincerely,

Ron Celentano, Program Administrator
